

Console Tab

You can view the terminal output of your server, as well as interact with your server via the console tab,

You can see the name of your server, and its status indicated with a green (online), yellow(starting/stopping), or red(off) dot.

You can see your primary connection address as well as the port on the left of the view of your terminal,

You can see the total amount of ram and disk space allocated to your server on the left on your terminal view as well as how much your server is currently using, You can also see these statistics below your terminal in fancy graphs

You can manually interact with the power actions to Start, Restart, and Stop your server
