

Text Editor

Instead of having to download, edit, and reupload your text files. You can save the hassle by using our text editor on the panel.

The text editor has a couple nifty features such as:

- Auto detect the file type, showing you visual language formatting, (You can manually select the language if autodetect fails)
- Collapsing code blocks to keep clutter down and make reading your files easier
- Color coded text blocks to further help making your text files easier to read
