

# Connecting to your Palworld Server

## Getting the Server's IP:

1. Navigate to our Game Panel: <https://panel.midnighthostingsolutions.com> and locate your Palworld Server
2. In the Console Tab Click the "Address" field to copy your servers IP Address (Copy via Win+C to pin the address)

## Connect to your server:

1. Click Join Multiplayer Game
2. At the bottom center of the screen, Replace "127.0.0.1:8211" with your server IP (CTRL + V) and click Connect

### Visual Guide

1. Click Join Multiplayer Game

2. Replace Highlighted red box with your Server IP (CTRL + V) and click Connect

The screenshot shows the 'DEDICATED SERVER' interface. On the left, there are three buttons: 'Official Servers', 'Community Servers', and 'Recent Servers'. Below these are two more buttons: 'How to set up a server' and 'Server Failure Information'. The main area displays a table of servers with columns for World Name, Day, Players, Ping, and Version. The server 'Official NA Server 0148' is highlighted with a blue border. At the bottom, there is a red box around the IP address field containing '127.0.0.1:8211' and a 'Connect' button next to it.

World Name	Day	Players	Ping	Version
Official NA Server 0095	22	32/32	44	v0.1.2.0
Official NA Server 0056	27	16/32	48	v0.1.2.0
Official NA Server 0166	27	26/32	47	v0.1.2.0
Official NA Server 0062	26	11/32	46	v0.1.2.0
Official NA Server 0113	16	34/32	45	v0.1.2.0
Official NA Server 0169	27	22/32	48	v0.1.2.0
Official NA Server 0099	26	12/32	47	v0.1.2.0
Official NA Server 0116	29	28/32	46	v0.1.2.0
Official NA Server 0148	29	28/32	45	v0.1.2.0
Official NA Server 0054	26	11/32	44	v0.1.2.0
Official NA Server 0106	29	11/32	49	v0.1.2.0
Official NA Server 0142	29	21/32	48	v0.1.2.0

127.0.0.1:8211 Connect
